

*****CIMIS*****

The California Irrigation Management Information System (CIMIS) is a program unit in the Water Use and Efficiency Branch, Division of Statewide Integrated Water Management, California Department of Water Resources (DWR) that manages a network of over 145 automated weather stations in California. CIMIS was developed in 1982 by DWR and the University of California, Davis (UC Davis). It was designed to assist irrigators in managing their water resources more efficiently. Efficient use of water resources benefits Californians by saving water, energy, and money. Visit the website @ www.cimis.water.ca.gov.

"Winter Water Wisely Tips"

- *When cleaning out fish tanks, give the nutrient-rich water to your non-edible plants.
- *Collect water from your roof by installing gutters and downspouts. Direct the runoff to plants and trees.
- *Let your lawn go dormant (brown) during the winter. Dormant grass only needs to be watered every three to four weeks, less if it rains.

REMINDER

Clear Creek C.S.D. would like to remind customers to please call the District Office any time water service needs to be turned off or on inside the meter box. This will ensure that District valves will only be operated by District employees, thus protecting the customer from charges incurred if valves are broken or meters are damaged. A field staff member is on-call during the weekends and in the evenings. **Please call 357-2121.**

Protect Yourself From Mosquitoes and the Diseases They Carry

Anything that can hold water for more than a few days can breed mosquitoes. **Drain or dump all containers in and around your home.**

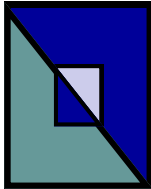

Practice the 4 D's

- ✓ **DRAIN** standing water
- ✓ **DUSK & DAWN** avoid outdoor activities
- ✓ **DRESS** wear long sleeves and pants during dawn and dusk
- ✓ **DEFEND** wear insect repellent

A handful of water can produce hundreds of mosquitoes. Neglected pools can produce more than a million mosquitoes and may affect people as far away as five miles.
